Make Your Own

Earth Day Character

A fun craftivity for students to make to celebrate Earth Day

© Imaginative Teacher

Earth Man Instructions

- Print the Earth Man face and hands / feet pages you wish to use (multiple options in color and black & white are included to reduce on printing costs).
- Cut out the Earth face, hands and feet.
- Cut long strips of colored paper. When these are folded the length will be considerably shortened so cut long strips!
- Attach two of the paper strips strips together at the ends as shown in Diagram 1
- Fold each strip over one another alternatively until you reach the ends, making sure to fold them down each time (as shown in Diagram 2).
- Once you reach the ends, glue or staple the two ends together. Once you let go of the paper, it will now become a spring.
- Using the spring, attach a hand or foot to one end and the other end to the Earth head as shown above to create your Earth man.
- Hang around or stick to the walls of your classroom.

Glue or staple the ends together
