

3-Digit Non-Standard Partitioning Roll and Read

To compose and partition three-digit numbers using non-standard partitioning.

Instructions

- On your turn, roll the dice.
- Choose one of the 3-digit numbers on the row that matches the number you rolled.
- Partition the number shown using non-standard partitioning.
- If your partner thinks you are correct, colour and claim that representation.
- Claim four in a line to win.

	327	218	945	452	361	573
	436	114	608	729	731	292
	818	873	565	179	938	739
	128	319	846	463	472	814
	937	915	539	230	732	383
	919	474	466	580	283	640

Record your non-standard partitioning on the next page.
