

14/7/2021 Oh I do like to be beside the seaside

Ron and Amir are making sandcastle towers.
First they build 2 on the bottom.
Then they build one on top.
How many sandcastles would they use
if they made a tower with 3 at the base?

How many sandcastles would they use
if they started with 4 on the base?

Ron and Amir have been collecting shells.
We collected fewer than 60 shells.
We can put them into groups of 5, with no shells left over.
We collected an odd number of shells.
The digits of the number add to more than 8
The digits of the number are not the same.
Can you guess how many we've collected?

Whitney and Eva have also been collecting shells.
We have fewer than 30 shells.
If we put them into groups of 5, there are 3 left over.
If we put them into groups of 8, there are 4 left over.
Can you guess how many we've collected?
