

# Tin Can Pen Pot

## You will need

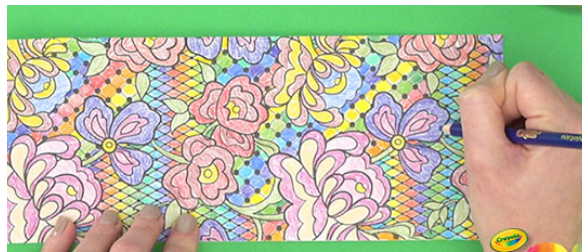

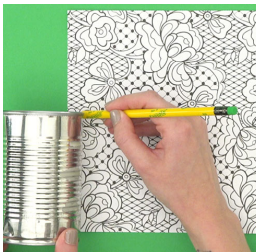

- A clean empty tin can
- Paper
- Scissors
- Glue

## Instructions

Look in your recycling bin for an empty can of beans or soup or similar. Carefully wash it out with soapy water to make sure there are no traces of food left inside. You can soak off the label in warm soapy water if you wish. Leave to dry.

Place the can side down onto a sheet of paper and measure how wide you will need your strip of paper to be. Cut it to size. Draw your design. You could do a face like the pots in the picture or use wrapping paper, Washi tape or draw your own decorative pattern. Once complete, wrap the paper around the can and glue down.

If you have chosen to make the penguin or unicorn, you will need to cut out the shapes you need.

The unicorn needs two ears, a horn, three flowers, eyes and some Washi tape around the base.

The penguin needs black paper, a white oval tummy, white eyes, orange or yellow paper for his beak and feet.
