

Which was the most common animal? *Sheep was the most common animal.*

How many more chickens than goats were there?

*There were four more chickens than goats.*

How many fewer cows than sheep were there?

*There were six fewer cows than sheep.*

Write a title for this pictogram. *Accept any title that accurately describes the pictogram.*

True or false? Class A saw 32 farm animals in total. *False - they saw 34.*

| Animal  | Number |
|---------|--------|
| Cow     | 6      |
| Sheep   | 12     |
| Pig     | 4      |
| Chicken | 8      |
| Goat    | 4      |

*Looking at the first block, 60 children said they did football after school so it cannot be true that only 19 children were asked altogether. Some children may be able to count beyond 100 and say that 190 children were asked. Amna has not looked at the scale. She thinks each block represents one child instead of ten.*

*Bill is correct. 40 children do swimming after school and 20 children do art. 40 is double 20.*

*Children draw an accurate block diagram with clear layout, appropriate scale, labels and a title. They give 5 facts about the data.*

*Possible facts:*

*The most common shoe size is size 1.*

*40 children were asked in total.*

*Four more children have size 13 than size 12.*

*20 children have size 1 and 2 altogether.*

*Four fewer children have size 13 than size 1.*
