

Black History Month

In October we celebrate Black History Month. At Bishopton Primary School we understand how important it is to teach our pupils a balanced and accurate portrayal of events that have occurred in the past.

During Black History Month we learn about the difficulties people from black and ethnic minority groups faced but also celebrate the successes of people who have had to overcome discrimination. We teach the children how to be accepting of all people no matter what their ethnic background and celebrate differences between cultures.
