What's been happening in Year 5?

English

In English this term, we have been reading both fiction and non-fiction texts. We started off looking at Malorie Blackman's Robot Girl. This was a gripping read all about A.I. We then ended this unit of work by writing our own Science Fiction narratives.

We have now moved onto "Hidden Figures" which is a non-fiction book telling the stories of four black women who were employed at NASA. We look forward to carrying on this book after half term.

Geography

In Geography, we have been looking at Greece and in particular the capital city of Athens.
We have used online maps to look at the physical geography of Greece as well as exploring time zones and why these happen.

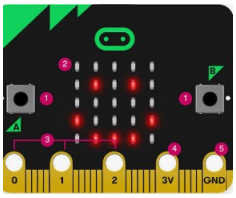

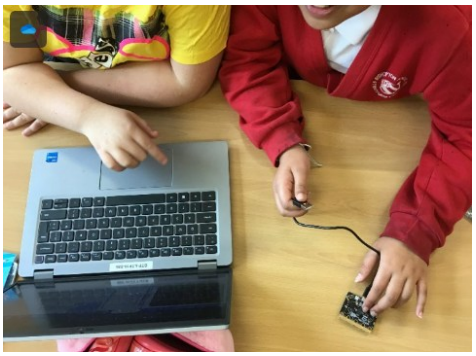

We ended our Geography unit by creating leaflets all about Athens. We look forward to re-visiting these skills again in the summer term when we look at China!

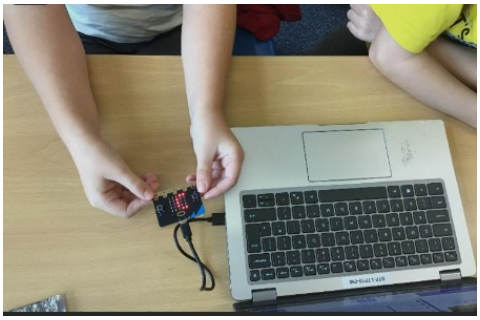

Microbit's 10th Birthday

We celebrated Microbit's 10th birthday this term by using the Microbits to create a birthday badge. We were impressed with how much we could

PSHE

In PSHE, we have been exploring the terms refugee and migrant. We have had great discussions about how to not be stereotypical about people. We have also reflected about our own responsibilities around school and the need for rewards and consequences. We ended the unit by creating our own games with random objects ensuring our rewards and consequences were clear.
